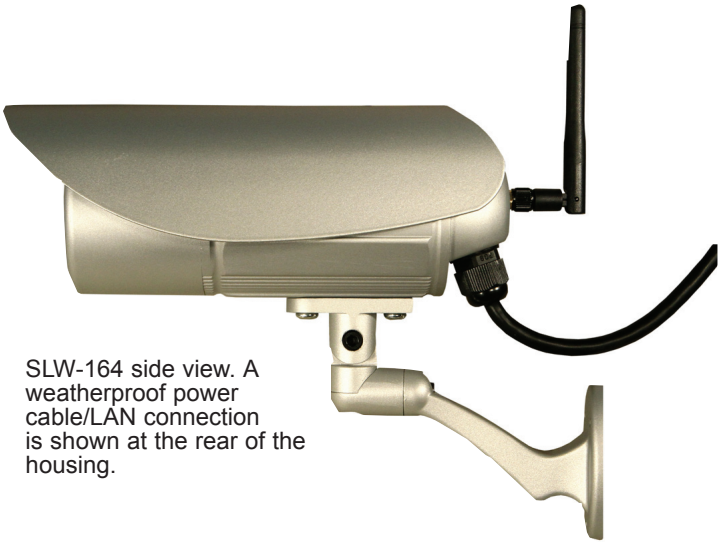
SLW-164 Weatherproof IP Internet Camera w/IR:
The Security Labs SLW-164 Camera contains a compact stand alone web server capable of remote video surveillance. It can be accessed from anywhere in the world via a standard web browser or mobile device. Camera video can be recorded onto a computer automatically when motion is detected or by a programmed schedule. Built in video motion detection can send an email or series of emails to a list of users to notify them of an event. Remote viewers can connect simultaneously. Protocols supported: HTTP, DDNS, TCP IP, UDP, SMTP, DHCP, FTP. The camera can be wall mounted indoors or outdoors.

A power supply and software CD is included with the SLW-164.



SLW-164 side view. A weatherproof power cable/LAN connection is shown at the rear of the housing.
